VERSUS CAPITAL REAL ASSETS FUND LLC Notes to Portfolio of Investments For the Period Ended June 30, 2025 (Unaudited)

Securities Valuation - The Board of Directors (the "Board") has established procedures (the "Procedures") pursuant to which the Fund prices its securities, consistent with Sections 2(a)(5) and 2(a)(41) of the 1940 Act, as follows:

Publicly Traded Securities - Investments in securities that are listed on the New York Stock Exchange (the "NYSE") are valued, except as indicated below, at the official closing price reflected at the close of the NYSE on the business day as of which such value is being determined. If there has been no published closing price on such day, the securities are valued at the mean of the closing bid and ask prices for the day or, if no ask price is available, at the bid price. Securities not listed on the NYSE but listed on other domestic or foreign securities exchanges are valued in a similar manner. Securities traded on more than one securities exchange are valued at the closing price of the exchange representing the principal market for such securities on the business day as of which such value is being determined. If, after the close of a domestic or foreign market, but prior to the close of business on the day the securities are being valued, market conditions change significantly, the domestic or foreign securities may be fair valued pursuant to the Procedures.

Securities traded in the over-the-counter market, such as fixed-income securities and certain equities, including listed securities whose primary market is believed by Versus Capital Advisors LLC (the "Adviser") to be over-the-counter, are valued at the official closing prices as reported by sources as the Board deems appropriate to reflect their fair market value. If there has been no official closing price on such day, the securities are valued at the mean of the closing bid and ask prices for the day or, if no ask price is available, at the bid price. Fixed-income securities typically will be valued on the basis of prices provided by a pricing service, generally an evaluated price or the mean of closing bid and ask prices obtained by the pricing service, when such prices are believed by the Adviser to reflect the fair market value of such securities. Syndicated loans are valued by Approved Pricing Sources at the average of broker quotes obtained from market makers deemed reliable by their internal evaluation staff or by internally developed models that incorporate both indicative quotes and actual trade data for similar loans.

Short-term debt securities, which have a maturity date of 60 days or less, are valued at amortized cost, which approximates fair value.

Investments in open-end mutual funds are valued at their closing Net Asset Value ("NAV").

Securities for which market prices are unavailable, or securities for which the Adviser determines that the market quotation is unreliable, will be valued at fair value pursuant to the Procedures. In these circumstances, the Adviser determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include recent transactions in comparable securities, information relating to the specific security and developments in the markets. The Fund's use of fair value pricing may cause the NAV of the Shares to differ from the NAV that would be calculated using market quotations. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of such security.

Private Debt Investments - The Fund will use its best efforts to value each private debt investment at its fair value under current market conditions. In doing so, the Fund will engage external valuation consultants to aid in the fair value determination of each private debt investment.

The Fund will work with the external valuation consultants to select an appropriate fair valuation approach for each private debt investment, which may include, but is not limited to, yield, market and cost approaches, or a combination of approaches. The external valuation consultant, in consultation with the Valuation Designee, may develop a unique valuation model or method for each individual private debt investment. The models and/or methods used may consider, among other things, comparable sector curve information, public market valuations, transaction prices, discounted cash flow analyses, assessments of borrower credit quality, borrower- or project-specific financial information, and/or other relevant information. Models may apply changes to certain public market inputs, such as comparable sector curves and/or benchmarks, only upon a change exceeding predetermined volatility thresholds and may also incorporate adjustments to public market inputs, such as the application of haircuts at levels which may vary based on market circumstances. The models and/or methods used by the external valuation consultant will produce information such as a specific price estimate, an estimated valuation range or confirmation that the prior day's price estimate remains appropriate.

The Fund will review the intended valuation approach and/or valuation model for each private debt investment as developed by an external valuation consultant prior to its implementation. This review may consider numerous factors such as the particular investment's contractual cash flows, the financial strength and operational performance of the borrower, and the debt instrument's spread to relevant base rates. The Fund may receive certain initial and/or periodic financial information from the borrower, loan administrator, arranger, monitoring agent, and/or other external parties, and will provide this information to the external valuation consultant for consideration in the valuation model.

The Fund will determine a fair valuation for each private debt investment daily, typically based on information received from an external valuation consultant (i.e., outputs from the models and/or methods described above). The Fund will review the valuation estimates provided by the external valuation consultants for reasonableness based on its knowledge of each investment and current market conditions. When a valuation range is provided, the Fund will generally determine to keep the valuation unchanged if the prior day's price falls within the current day's range. These valuation processes may result in a private debt investment's valuation being unchanged for a period of time.

In certain circumstances, an externally provided valuation range or specific price estimate may be unavailable or the Fund may determine that the valuation received does not represent the fair value of the private debt investment based on current market conditions. In such an instance, the Fund will determine the fair value of the investment, in good faith, via alternative means which may include, among others, valuing the investment at its prior day's price, valuing the investment at its amortized cost, or implementing an internally developed model. In determining such a fair valuation, the Fund may consider any information it deems appropriate including as received directly from the borrower, as received from alternative external information sources, including monitoring agents, or as reflected by current general market conditions.

VERSUS CAPITAL REAL ASSETS FUND LLC Notes to Portfolio of Investments For the Period Ended June 30, 2025 (Unaudited) (continued)

Private Investment Funds - The Fund typically values its investments in each Private Investment Fund according to the value reported by each Private Investment Fund's quarterly NAV statement. The Fund also reviews this information for reasonableness based on its knowledge of current market conditions and the individual characteristics of each Private Investment Fund and may clarify or validate the reported information with the applicable manager of the Private Investment Fund. The valuation for each Private Investment Fund is individually updated as soon as the Fund completes its reasonableness review, including any necessary information validations with the manager of the Private Investment Fund, and typically within 45 calendar days after the end of each quarter for all Private Investment Funds. The Fund may conclude, in certain circumstances, that the information provided by any such manager does not represent the fair value of the Fund's investment in a Private Investment Fund and is not indicative of what actual fair value would be under current market conditions. In those circumstances, the Fund may determine to value its investment in the Private Investment Fund at a discount or a premium to the reported value received from the Private Investment Fund. Any such decision will be made in good faith by the Fund and will be reported to the Board's Valuation Committee at its next regularly scheduled quarterly meeting. The Fund shall use its best efforts to ensure that each of such Private Investment Funds has in place policies and procedures that provide underlying principles behind the disclosure of reliable information with adequate supporting operational practices.

Additionally, between the quarterly valuation periods, the NAVs of such Private Investment Funds are adjusted daily based on the total return that each Private Investment Fund is estimated by the Fund to generate during the current quarter (the "Investment Accrual Rate"). The Fund determines the Investment Accrual Rate at the beginning of each quarter, based on internally developed models that weight the expected impacts of income and appreciation projections by property sector, adjusting for expected market factors and underlying expenses. The Fund monitors these estimates regularly and updates them as necessary if macro or individual fund changes warrant any adjustments.

In certain circumstances, the Fund may access daily or periodic NAV information provided by a Private Investment Fund. In such an instance, the Fund may determine to value its investment in a Private Investment Fund according to this information and may forego daily valuation adjustments based on an Investment Accrual Rate.

If the Fund does not have access to sell shares of a Private Investment Fund in its primary market, the Fund may determine to fair value the Private Investment Fund at a price other than its NAV. In such an instance, the Fund may consider any information it deems appropriate including as received from broker-dealers and/or pricing services or comparable sales in the secondary market. Any such fair valuation determinations will be made in good faith by the Fund, may be based upon an internally developed pricing model, and will be reported to the Board's Valuation Committee at its next regularly scheduled quarterly meeting.

The June 30, 2025 Portfolio of Investments presented herein reports the value of all the Fund's investments in Private Investment Funds at the respective NAVs provided by the managers of the Private Investment Funds and their agents, which may differ from the valuations used by the Fund in its June 30, 2025 NAV calculation.

Due to the inherent uncertainty of determining the fair value of investments that do not have readily available market quotations, the fair value of the Fund's investments may fluctuate from period to period. Additionally, the fair value of investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values the Fund may ultimately realize. Further, such investments may be subject to legal and other restrictions on resale or may otherwise be less liquid than publicly traded securities.

<u>Sub-REIT Investment</u> - The Fund has adopted procedures pursuant to which the Fund will value its investment in the Sub-REIT at fair value. In accordance with these procedures, the Adviser shall require the external management companies of any direct investments to follow similar procedures to those that are outlined above for the continuously offered Private Investment Funds.

At June 30, 2025, Versus Capital Real Assets Sub-REIT II LLC owned: almond, walnut, peach and prune properties in Placer and Sutter counties in California fair valued at approximately \$18.2 million, net of property level debt; and a hazelnut property in Benton County, Oregon fair valued at approximately \$20.3 million.

Fair Value Measurements: The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 unadjusted quoted prices in active markets for identical securities
- Level 2 prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

At the end of each calendar quarter, management evaluates the classification of Levels 1, 2 and 3 assets and liabilities. Various factors are considered, such as changes in liquidity from the prior reporting period; whether or not a broker is willing to execute at the quoted price; the depth and consistency of prices from third party pricing services; the existence of contemporaneous, observable trades in the market; and changes in listings or delistings on national exchanges. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of inputs used to value the Fund's investments as of June 30, 2025 is as follows:

VERSUS CAPITAL REAL ASSETS FUND LLC Notes to Portfolio of Investments

For the Period Ended June 30, 2025 (Unaudited) (continued)

	Total Fair Value at 06/30/2025	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs

Balance as of 06/30/2025	\$79,380,251	\$48,206,151	\$31,174,100	<u>\$—</u> **

^{**} Securities valued at \$0.

For the period ended June 30, 2025, the total change in unrealized gain/loss on Level 3 securities still held at the end of the period was \$(1,848,233).

The Sub-REIT is categorized as Level 3 of the fair value hierarchy and its fair value is largely based upon the externally appraised values of the underlying properties that it holds. Such appraisals are generally based on identified comparable sales as well as discounted cash flow analyses that rely on contractual lease factors, estimates of crop yields and appropriate discount rates. Significant changes in such estimates could have material changes to the appraised values of the underlying properties and the resulting fair values of the Sub-REIT. The following table summarizes the valuation techniques and significant unobservable inputs used for the Fund's investments that are categorized in Level 3 of the fair value hierarchy at June 30, 2025:

Category	Total Fair Value at 06/30/2025	Valuation Technique	Unobservable Inputs	Input Range	Weighted Average
Private Investment Funds (Sub-REIT)	\$48,206,151	Discounted Cash Flow	Discount Rate	7.50%	7.50%
		Income Capitalization Approach	Cap Rate	5.25% - 5.50%	5.37%

^{**} Securities valued at \$0.

Market Risk Factors - The Fund's investments in securities and/or financial instruments may expose the Fund to various market risk factors including, but not limited to the following:

General Market Fluctuations Will Affect the Fund's Returns. At times, the Fund's investments in Private Investment Funds and Real Asset Related Investments will be negatively affected by the broad investment environment in the timberland, agriculture/farmland or infrastructure markets, the debt market and/or the equity securities market.

Risks of Investing in Infrastructure. An investment in the Fund is subject to certain risks associated with the ownership of infrastructure and infrastructure-related assets in general, including: the burdens of ownership of infrastructure; local, national and international economic conditions; the

^{**} Securities valued at \$0.

VERSUS CAPITAL REAL ASSETS FUND LLC Notes to Portfolio of Investments For the Period Ended June 30, 2025 (Unaudited) (continued)

supply and demand for services from and access to infrastructure; the financial condition of users and suppliers of infrastructure assets; changes in interest rates and the availability of funds which may render the purchase, sale or refinancing of infrastructure assets difficult or impracticable; changes in environmental laws and regulations, and planning laws and other governmental rules; environmental claims arising in respect of infrastructure acquired with undisclosed or unknown environmental problems or as to which inadequate reserves have been established; changes in energy prices; changes in fiscal and monetary policies; negative developments in the economy that depress travel; uninsured casualties; force majeure acts, terrorist events, under-insured or uninsurable losses; and other factors which are beyond the reasonable control of the Fund or the Private Investment Funds.

Risks of Investing in Timberland. An investment in the Fund is subject to certain risks associated with the ownership of timberland, timber and timber-related assets in general, including: the volatility of forest product prices; changes in foreign and U.S. trade and tariff policies; general market forces, such as regional growth rates, construction activity, changes in currency exchange rates and capital spending; competition from the use of alternative building materials and other decreases in demand; forestry regulations restricting timber harvesting or other aspects of business; the illiquidity of timber related asset investments; losses from fire and other causes; uninsured casualties; force majeure acts, terrorist events, underinsured or uninsurable losses; and other factors which are beyond the reasonable control of the Fund or the Private Investment Funds.

Risks of Investing in Agriculture/Farmland. Investments in agriculture/farmland are subject to various risks, including adverse changes in national or international economic conditions, adverse local market conditions, adverse natural conditions such as storms, floods, drought, windstorms, hail, temperature extremes, frosts, soil erosion, infestations and blights, failure of irrigation or other mechanical systems used to cultivate the land, financial conditions of tenants, marketability of any particular kind of crop that may be influenced, among other things, by changing consumer tastes and preferences, import and export restrictions or tariffs, casualty or condemnation losses, government subsidy or production programs, buyers and sellers of properties, availability of excess supply of property relative to demand, changes in availability of debt financing, changes in interest rates, real estate tax rates and other operating expenses, environmental laws and regulations, governmental regulation of and risks associated with the use of fertilizers, pesticides, herbicides and other chemicals used in commercial agriculture, zoning laws and other governmental rules and fiscal policies, energy prices, changes in the relative popularity of properties, risk due to dependence on cash flow, as well as acts of God, uninsurable losses and other factors which are beyond the control of Private Investment Funds.

Risks of Investing in Equity Securities. The prices of equity and preferred securities fluctuate based on changes in a company's financial condition and overall market and economic conditions. Preferred securities may be subject to additional risks, such as risks of deferred distributions, liquidity risks, and differences in shareholder rights associated with such securities.

Risks of Investing in Debt Securities. The Fund will invest in real asset related debt securities. Other factors may materially and adversely affect the market price and yield of such debt securities, including investor demand, changes in the financial condition of the borrower, government fiscal policy and domestic or worldwide economic conditions. The Fund's debt securities will be subject to credit risk, which is the risk that an issuer will be unable to make principal and interest payments on its outstanding debt obligations when due.

Unfunded Commitments. In order to meet its obligation to provide capital for unfunded commitments, the Fund may have to hold some, or in certain cases a substantial amount, of its assets temporarily in money market securities, cash or cash equivalents, possibly for several months; liquidate portfolio securities at an inopportune time; or borrow under a line of credit. This could make it difficult or impossible to take or liquidate a position in a particular security at a price consistent with the Adviser's strategy.

Interest Rate Risk. A wide variety of factors can cause interest rates or yields of U.S. Treasury securities or other types of bonds to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, reduced market demand for low yielding investments, etc.). Recently, the U.S. Federal Reserve has increased interest rates from historically low levels, resulting in rising interest rates across the financial system. Thus, the Fund currently faces a heightened level of risk associated with high interest rates and/or bond yields.

Liquidity Risk. The Fund will invest in restricted securities and other investments that are illiquid. Restricted securities are securities that may not be sold to the public without an effective registration statement under the Securities Act, or, if they are unregistered, may be sold only in a privately negotiated transaction or pursuant to an exemption from registration under the Securities Act. The Fund may be unable to sell restricted and other illiquid securities at the most opportune times or at prices approximating the value at which it purchased such securities. The Fund's portfolio may include a number of investments for which no market exists and which have substantial restrictions on transferability.

In addition, the Fund's interests in the Private Investment Funds are subject to substantial restrictions on transfer. The Fund may liquidate an interest and withdraw from a Private Investment Funds pursuant to limited withdrawal rights. Some Private Investment Funds may subject the Fund to a lockup period or otherwise suspend the repurchase rights of their shareholders, including the Fund, from time to time. Further, Private Investment Funds managers may impose transfer restrictions on the Fund's interests. There may be no secondary market for the Fund's interests in the Private Investment Funds. The illiquidity of these interests may adversely affect the Fund were it to have to sell interests at an inopportune time. Sub-REITs invest in illiquid assets, and may be unable to sell their assets, or be forced to sell them at reduced prices. The Adviser may also invest directly in other private securities that they may not be able to sell at the Fund's current carrying value for the securities.

Market Disruption, Health Crises, Terrorism and Geopolitical Risks. The Fund's investments may be negatively affected by the broad investment environment in the real assets market, the debt market and/or the equity securities market. The investment environment is influenced by, among other things, interest rates, inflation, politics, fiscal policy, current events, competition, productivity and technological and regulatory change. In addition, the Fund may be adversely affected by uncertainties such as war, terrorism, international political developments, sanctions or embargos, tariffs and trade

wars, changes in government policies, global health crises or similar pandemics, and other related geopolitical events may lead to increased short-term market volatility and have adverse long-term effects on world economies and markets generally, as well as adverse effects on issuers of securities and the value of investments.

Restricted Securities. Restricted securities include securities that have not been registered under the Securities Act of 1933, as amended, and securities that are subject to restrictions on resale. The Fund may invest in restricted securities that are consistent with the Fund's investment objective and investment strategies. Investments in restricted securities are valued at net asset value as practical expedient for fair value, or fair value as determined in good faith in accordance with procedures adopted by the Board. It is possible that the estimated value may differ significantly from the amount that might ultimately be realized in the near term, and the difference could be material. Each of the following securities can suspend redemptions if its respective Board deems it in the best interest of its shareholders. This and other important information are described in the Fund's Prospectus.

As of June 30, 2025, the Fund invested in the following restricted securities:
